## GETTING STARTED

Press the Start Button at the ESPN's Baseball Tonight Title Screen to get to the Game Selection Screen.

## GAME SELECTION

On the Main Options screen, press LEFT and RIGHT on the D Pad to change options. Press the D Pad UP and DOWN to highlight the play options listed, then press the Start Button to make your selection.

The Main Options are as follows:

**1-PLAYER GAME:** Lets you play against the Sega CD System in either Exhibition, Season or Playoffs competition. You can also choose to play a 1-Player or 2-Player game by highlighting the "1-Player" option and pressing the D Pad LEFT or RIGHT to select the "2-Player" option.

**2-PLAYER GAME:** Lets you play against another person in either Exhibition, Season or Playoffs competition.

**EXHIBITION PLAY:** What a game! Not just baseball, but ESPN's Baseball Tonight. Choose a club and go into your exhibition mode. These games are full-out but strictly *off* the record. So now's your chance to test your team's limits as well as the skills of your competition.

**PLAYOFFS COMPETITION:** Talk about a great match-up! This, folks, is it! In 1-PLAYER mode, you choose a team to take into the playoffs for either the National League or the American League pennant. If you win the pennant, the Sega CD System determines the outcome of the other league's playoffs. You will then go up against that team in the World Series.

ESPN Baseball Tonight gives you the option to choose between playing a 2 Division League or a 3 Division League. Make your choice at the Game Play Options Screen by scrolling down to "3 Division League" and toggling the D Pad left or right to make your selection. Then press the Star Button to confirm your selection.

**Note:** For 1 or 2 player Exhibition Play, game play is unaffected.

**PRACTICE MODE:** Trim your sails, or somebody may do it for you! Before you race for the pennant, you may want to get some batting practice. Press the C Button to toggle between pitching and batting practice. Press the Start button to exit the practice mode.

**SEASON MODE:** Now you're playing in the big leagues! Play the whole 162 game season if you wish or adjust the season to the length that you want. If you choose this

mode, you will bring up the Season Calendar. When the Season Calendar comes up, use the D Pad to scroll through the months in the season. Press the C Button once you have selected a

month when you want to begin and use the yellow highlight cursor to pick the game day you want. In Season Mode you can choose any point in the season where you want to start (only moving forward), and you will go to that game. Based upon many attributes, the computer will simulate how your team did in the games in-between the game you last played and the current game selected. In other words, you potentially play one game out of every month and the computer will play the others for you.

**HOME RUN DERBY:** Here's your chance to really rip the cover off the ball! You get fifteen pitches to show your stuff with your favorite team.

**Note:** On the 15th pitch, if the player hits a home run, he gets another pitch. This repeats until the player fails to hit a home run.

One or two players can go up against the pitching machine. Do well, and you just might be labeled a major leaguer! Here's the controls:

A Button - Swing the bat

B Button - Bunt

## ESPN SPORTSCENTER UPDATE

Press the Start Button following the team selection and we'll take you straight to the ESPN SportsCenter Screen, where yours truly, Chris Berman will announce your game.

## LINE-UP SCREEN

Let me tell ya, ladies and gentlemen: It all starts here, with the line-ups.

The Line-Up Screen appears when you choose your team. The Line-Up Screen shows a roster of all the members of your team, arranged in batting order. Along with each player's number,

you see his position, current condition, handedness, and his stats. To view all of the stats associated with the players, use D Pad RIGHT and LEFT. To view your Bullpen and Bench rosters, press the B Button.

You can view the opposing teams line-up by pressing the C Button. To return to your line-up press either the START Button or the C Button.

If you decide to change your starting line-up, you can exchange the players' positions in the batting order by using the D Pad UP and DOWN to highlight the first player you want to swap. Pressing the A Button selects this player. Then using the D Pad UP and DOWN again, highlight the second player and press the A Button. The two players will have exchanged positions in the batting order.

**NOTE:** This is only allowed before entering the game.

## BENCH

This screen displays your reserve players.

## BULLPEN

This displays your pitching staff — relievers and starters.

## IN THE GAME

On the Main Game Screen, here's where you can get important information on your current game:

—— GAME STATUS

—— RADAR MAP

**RADAR MAP:** Indicates the current location of fielders, runners on the bases, and the ball.

**GAME STATUS:** This display appears automatically when a run is scored.

**INNINGS:** Displays current inning of the game.

**TEAM STATUS:** Displays the team names and shows the current total of runs, hits, and errors of each team.

**RADAR GUN:** Located at the bottom left of the screen, a number will appear if the ball is not hit after every pitch to indicate the actual MPH of the pitch.

## MAKING A PLAYER SUBSTITUTION

To make a substitution in your lineup, use the D Pad UP and DOWN to highlight the player in the lineup you wish to replace. That player's number and stats will then appear at the bottom of the screen. Next, press the B Button to move either the Bullpen or Bench Screen and highlight the player you wish to place in your lineup. This player along with the player you wish to remove from your lineup, will appear at the bottom of the screen. Press the A Button to make the substitution. If a game has started, the player who was on the lineup screen is removed from the game. If this is done before the game, the player will be placed back on the bench or in the Bullpen and will be available for later use.

Press START to return to the game.

**3 DIVISION LEAGUE PLAYOFFS BRACKET**

Select "Enter Playoffs" after you have selected the 3- Division League. Once one player has selected his/her league and division, the other player is forced to choose another division within the same league.

The playoffs bracket appears as follows: Eight teams are represented; four from the National League and four from the American League. These four slots correspond to the East, West and Central Divisions as well as the Wild Card (the team from the remaining non-division champions that has the best record in the league).

Player #1's selected team will appear in the top position of the upper bracket. The second slot in that branch will be filled by Player #2 (if any) or by the computer. The remaining slots in the brackets will be rounded out by teams from the appropriate divisions and leagues, including the wild card slots. The computer-selected teams can be changed by the player to any other team within that same league and division (a player may not, for example, replace a team from the National League Central with one from the National League East, unless that slot is filled by a wild card).

**2-DIVISION LEAGUE PLAYOFFS BRACKET**

Select "Enter Playoffs" after you have selected the 2- Division League. Once one player has selected their league and division, the other player is forced to choose another division within the same league.

The playoffs bracket appears as follows: Four teams are represented, two from the National League on the top half of the bracket and two from the American League on the bottom half of the bracket.

East plays West in both leagues — Player #1 vs. computer or Player #1 vs. Player #2. The computer determines the outcome of the other portion of the bracket, and the outcome of these two matches in a 7-game series (Player match and computer match) determines the pennant winners. These two teams then meet in a 7-game series (the World Series) to determine the World Champion.
